

## **Advanced Standing**

Students must have been granted advanced standing to enroll in 300 or 400 level courses in the College of Engineering. To qualify for permanent advanced standing, students must meet the following criteria:

### **Completion of the Required Courses**

Successful completion of all required courses listed in the freshmen and sophomore years of the appropriate curriculum track for mining majors and the general curriculum for geological engineering majors. At least 12 units of required courses must have been completed at The University of Arizona. In addition, all admission deficiencies must have been removed.

### **Cumulative Grade Point Average**

A University of Arizona cumulative grade-point average in the above courses (excluding INDV, TRAD, ART/HUM Courses) of not less than 2.000 (2.25 for students in the WUE program).

### **Temporary Advanced Standing**

Students otherwise qualified and lacking no more than three required lower-division courses, may be granted temporary advanced standing. If these requirements are not completed during the next semester they are offered, the temporary advanced standing may be revoked until they are completed.

Transfer students who do not meet the 12-unit requirement set forth above, but who meet all other requirements, will be granted temporary advanced standing until they have completed a minimum of 12 units of required courses at The University of Arizona. At that time advanced standing will become permanent if the departmentally specified grade-point average requirement is met. If not, the temporary advanced standing will be revoked.

### **Application for Advanced Standing Forms**

Application forms are available from the MGE Department office in Mines 229.

Students wishing to enroll in 300 or 400 level engineering courses, who are registered in colleges other than the College of Engineering, will normally be expected to have fulfilled the above criteria relative to their own majors. Such students should apply for permission at the MGE Department office, Mines 229.
